UNIVERSITY OF
WATERLOO

ABOUT US

We are a group of young minds passionate about self-developed rocket technology.

Waterloo Rocketry is a team of undergraduate students who represent the University of Waterloo in Ontario, Canada. Our members have diverse backgrounds and skillsets from a variety of engineering and science disciplines. Our team competes annually in the Spaceport America Cup at Spaceport America, New Mexico, the largest intercollegiate rocket engineering competition in the world. We strive to provide students with opportunities to solve real engineering problems, giving them a unique and exciting way to develop skills in a hands-on setting.

PAST PROJECTS

Since our founding in 2009, Waterloo Rocketry's team of undergraduate students has annually designed, built, and tested a rocket, as well as all ground support equipment and operational procedures necessary to achieve launch. Every aspect of our rocket is student developed, including the engine, airframe, recovery system, and in-flight electronics.

UNEXPLDED ORDNANCE (UXO) - 2018

Waterloo Rocketry's 8th rocket, UXO, attained an altitude of over 13,000 ft at the 2018 Spaceport America Cup, higher than any other hybrid rocket launched that year. This rocket also placed 1st in the 10,000 ft Hybrid category.

SHARK OF THE SKY (Sots) - 2019

Our most recent project, Shark of the Sky, launched to an altitude of over 15,500 ft, an all time best for Waterloo Rocketry. This rocket placed 2nd in the 30,000 ft Hybrid category. This year we also developed a payload involving a microgravity experiment chosen as 1 of 4 to compete in the Canadian Reduced Gravity Experiment Competition (CAN-RGX).

CURRENT PROJECT

This year, Waterloo Rocketry is aiming higher than ever before.

OUR PAYLOAD WILL HOUSE A
PARTICLE PHYSICS
EXPERIMENT

WE'RE STARTING DEVELOPMENT OF A
LIQUID ENGINE

WE WILL COMPETE AGAINST OVER
120 TEAMS
FROM AROUND THE WORLD AT THE SA CUP

In order to achieve this year's goals, our main objectives will include a complete overhaul of our payload and recovery, in addition to upgrades to our engine, airframe and avionics. We will continue to enhance and refine our vehicle and ground equipment as necessary in support of our primary objectives.

WHY SPONSOR US?

Our team attracts highly driven problem-solvers who are capable of learning quickly, working diligently, and delivering reliably. Your organization can gain exposure to some of the most promising students that Waterloo Engineering has to offer.

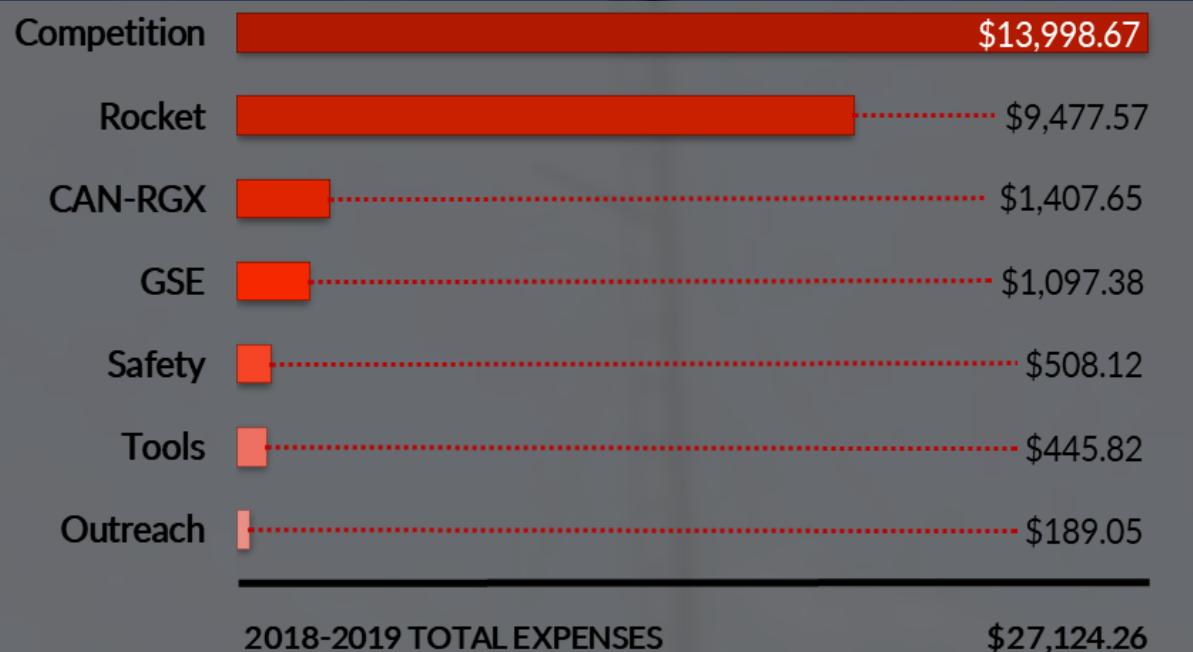

As demonstrated over the past three years at the Spaceport America Cup, our team has the potential to win. With success comes exposure, and we always represent our sponsors with pride.

By sponsoring us, you will allow us to reach greater heights and set higher goals for ourselves and for the team. You will be supporting a motivated group of students and the next generation of engineers.

TEAM SPENDING

This is a summary of the team's expenses over the 2018-2019 competition cycle. Competition costs include fees and University sponsored travel expenses. Each member who attends competition pays roughly \$300 out of pocket in addition to the costs shown.

Research and development accounts for approximately 80% of our non-competition expenditure every year, and includes development of our rocket and Ground Support Equipment (GSE). Our expenses include fabrication materials, electronics, chemicals, and testing infrastructure.

SPONSORSHIP TIERS

These tiers are rolling and cumulative over two years. Unrenewed sponsorships will be listed as "previous sponsor" with a logo on the team web page.

	Bronze \$0-\$2499	Silver \$2500-\$4999	Gold \$5000-\$7499	Platinum \$7500+

FINAL WORDS

From all of us at Waterloo Rocketry,

Thank you for taking the time to review this package. Through this team and the support of our sponsors, our team members have been able to learn and develop countless valuable skills, and we know that there is still so much more to explore.

We hope that you will consider supporting our mission to inspire the next generation of scientists and engineers through the application of rocketry at the University of Waterloo.

We greatly appreciate your consideration and we hope that you will be part of our success.
